

NURIT 2080 TERMINAL

Designed for years of dependable operation, the NURIT naturally operates with any of the NURIT series of impact and thermal roll printers providing the user with the "ideal All-In-One Modular Solution".

Logically, this terminal is also designed to smoothly integrate and operate with external printers of most other manufacturers. Low-cost, high-performance NURIT 2080 capability Fast and efficient transaction time using helpful pre-dial/pre-print capability Very compact integrated design; wall or swivel base mountable One terminal for multiple applications (restaurant, retail, etc...)

- Communicates via built-in telephone modem for operation over regular telephone lines or cellular networks via external interface
- Supports both asynchronous and synchronous communication networks
- AMEX split-dial use for authorization/settlement and/or private label hosts
- Multi-host operational capability for diverse applications
- Accepts all major credit, debit, and private label cards as well as cash
- Provides card authorization and check guarantee
- Accepts electronic benefits transfer (EBT)
- Optional in-board smart card interface with Security Access Module (SAM)
- Supports peripherals such as PCs, PIN pads, smart card and check readers
- Clearly labeled function keys
- User-friendly operational menu system seen on large, back-lit LCD display
- Large memory for detailed current and past (history) batch reports (up to 300 batch records)

The NURIT 2080 terminal is perfect for the home-based business where a receipt printer is not required.

It offers the same processing power, flexibility and fast transaction speed as the 2080 in a stand-alone terminal package.

The NURIT 2080 features the state-of-the-art Address Verification Service (AVS), which helps to prevent "electronic shoplifting" by mail order fraud.
